OPTICS AND LASER TECHNOLOGY

INDEX TO VOLUME 7

Research and development

Aircraft windows to have controllable transparency, 51
Aspheric germanium lenses, 195
Breaking glass fibres with temperature shock, 4
Displays use fringe field effect, 99
Electron beam ignites high power laser, 147
Gas discharge display, 195
Guidance unit for Anglo-Australian telescope, 3
Holographic analysis of aerosols, 195
Large LED display, 195
Laser fusion to use twelve beams, 3
Laser makes integrated circuit connections, 51
Solid state laser improves scanner, 52
Solid state sensors for tv cameras, 51

Industry

Charge coupled device has patent, 53
CO_2 laser for industry, 243
CO_2 laser picked for good design, 149
Computer operated laser trimmer, 243
Data transmission by optic waveguide, 9
Fine wire gauge, 100
Giant crystal puller for GaP, 202
Improved displays for Nimrod, 9
Infra-red milk analysers, 100
Laser contract work, 99
Laser mask trimmer, 150
Laser micro-driller, 150
Laser penetrates iron curtain, 53
Laser plotting service, 201
Laser resistor trimmer, 53
Laser system for quality control, 55
Laser system wins IR-100 award, 243
Laser welder has high rep rate, 9
Microscope-laser analyser, 201
New optics agency for UK, 202
Optical strain gauge, 149
Optical waveguides used in eye surgery instrument, 52
Power Beams group formed by BOC, 244
Precision photo-etching and electro-forming, 201

Literature

Argon laser, 104
Electronic aids to night vision, 8
Flash tubes, 60
Harmonic generation, 248
Helium-neon laser, 248
High voltage power supplies, 60
Holography, 104
Image analysis, 60
Industrial lasers, 196
Infra-red filters, 248
Journal of Current Laser Abstracts, 60
Korad laser systems, 196
Laser Doppler anemometry, 8
Laser news, 60
Laser optics, 196
Laser scribing systems, 8
Light measurement, 152
Liquid crystal displays, 104
Optical data links, 152
Optical devices and systems, 8
Optical fabrication and coating, 247
Optical products, 196
Photo couplers, 60
Photomultiplier tubes, 152
Solid state cameras, 8

Products

Coated optics for CO_2 lasers, 103
Coherent fibre optic system, 152
cw CO laser operates at room temperature, 100
Cylindrical mirror mounts for improved stability, 198
Detector has pyro-electric ceramic element, 57
Detectors for infra-red pulses, 244
Diffraction gratings, 6
Diodes for optical waveguides, 55
Dye laser covers visible range, 5
Dye laser has jet stream design, 199
Dye laser has long lifetimes, 6
Fibre optic transmission systems, 101
Fringe-free double pulse holograms, 150
General purpose Nd-YAG laser, 6
General purpose YAG laser, 101
Grating monochromators, 59
High damage threshold mirrors, 58
High power HF/DF laser, 58
High power ion laser, 58
High speed lens, 5
High speed photodiode – amplifer, 199
Image intensifier diode, 58
Intensified silicon vidicon, 198
Ion lasers, 199
Large area energy meter is fast, 7
Laser gives high power in uv, 7
Laser mirrors, 151
Laser video kit, 199
Light for optical fibres, 57
Lithium niobate parametric oscillator crystals, 151
Long range proximity detector, 198
Measures natural and artificial light, 246
Miniature detector for the infra-red, 103
New ion laser has increased output, 151
New metal vapour laser, 59
Optical benches have low profile, 4
Optical coating service, 199
Optical construction system, 196
Optical feedback controls output, 247
Optical ruler, 244
Optic cable, 150
Orange, green, and yellow LED's, 59
Portable holocamera, 104
Power supplies for CRT's, 58
Precision pinholes, 244
Precision radiometer, 55
Pulsed laser energy monitor, 198
Pyro-electric spot radiometer, 7
Pyroelectric standard radiometer, 152
Quantum photometer, 5
Quarter metre monochromator, 198
Radiometer/photometer measures reflectance, 6
Re-usable photographic material, 58
Rotary tables, 151
Safety aids for laser users, 55
Second harmonic generation, 100
Seeing in the dark, 103
Short pulse laser has clean beam, 57
Streamlined dye laser, 246

Advisory editors, 248

Books

Applications of geometrical optics *Edited by W. J. Smith* (reviewed by M. H. Freeman) 47
Developments in laser technology – II *Edited by R. F. Wuerker* (reviewed by I. J. Spalding) 191
Dividing, ruling and mask making *D. F. Horne* (reviewed by S. C. Bottomley) 143
High energy lasers and their applications *Edited by S. F. Jacobs, M. Sargent III, M. O. Scully* (reviewed by I. J. Spalding) 239
Holographic non-destructive testing *Edited by R. F. Erf* (reviewed by M. Marchant) 190
Holography *M. Françon* (reviewed by A. E. Ennos) 142
Image intensifiers: technology, performance, requirements, and applications *Edited by A. D. Schnitzler, M. W. Klein* (reviewed by P. Schagen) 92
Image science *J. C. Dainty, R. Shaw* (reviewed by T. Wojtowicz) 143
Industrial lasers and their applications *J. E. Harry* (reviewed by H. Foster) 141
Infra-red detectors *Edited by R. D. Hudson, Jr, J. W. Hudson* (reviewed by W. R. Bradford) 282
Laser applications to optics and spectroscopy *Edited by S. F. Jacobs, M. Sargent III, J. F. Scott, M. O. Scully* (reviewed by B. S. Wherrett) 282
Laser plasmas and nuclear energy *H. Hora* (reviewed by D. E. T. F. Ashby) 237
Optics *E. Hecht, A. Zajac* (reviewed by H. G. Jerrard) 91
Principles of optics (5th edition) *M. Born, E. Wolf* (reviewed by W. T. Welford) 190
Problems in optics *M. Rousseau, J. P. Mathieu* (reviewed by G. Wright) 95
Self-focusing of laser beams in dielectrics, plasmas and semiconductors *M. S. Sodha, A. K. Ghatak, V. K. Tripathi* (reviewed by W. J. Firth) 141
Space Optics *Edited by B. J. Thompson, R. R. Shannon* (reviewed by J. R. Coldrick) 45
Technische Anwendungen des Lasers (Technical applications of lasers) *D. Rosenberger* (reviewed by W. Krieger) 281
The spectroscope *K. I. Tarasov* (reviewed by J. M. Vaughan 93

Conferences

Electro-optics '74 West (5–7 November 1974) 37
First European conference on optical fibre communication (September 1975) 280
High speed photography (25–26 March 1975) 138
International conference on optical methods in scientific and industrial measurements (25–30 August 1974) 91
International laser exposition (5–7 November 1974) 40
International optical computing conference (23–25 April 237
Laser 75 (June 1975) 271
Second national quantum electronics conference (September 1975) 278
Third conference on the laser (22–25 April 1975) 184

Titles of articles, research notes, and letters to the editor

Avalanche photo-diodes for high frequency applications *M. A. G. Clark, Q. V. Davis* 31
Colour micro-storage and display system using focused image holograms, A *M. T. Gale, K. Knop, J. P. Russell* 234
Correction of axial deflection errors in rotating mirror systems *J. Helmberger, K. Stadler, F. Bestenreiner* 249
Deconvolution systems for coded aperture images of three-dimensional x-ray objects *H. Weiss, E. Klotz, R. Linde* 117
Design and construction of a large aperture optical system using holographic and interferometric testing techniques, The *R. W. Evans, P. Gallagher, D. A. Rimmer* 203
Electro-optic modulators for lasers *A. Waksberg* 209
Fabrication of apodized apertures for laser beam attenuation *E. W. S. Hee* 75
Free field fringes in Mach-Zehnder interferometry *P. Cooley* 163
Fundamentals of liquids crystals and other liquid display technologies *J. A. Castellano* 259
Future cockpit displays *J. H. Wharf, B. Ellis* 25
Holographic fundoscopy with fibre optic illumination *A. N. Rosen* 127
Illumination system for photo-processing by the proximity printing method *S. C. Bottomley, E. G. Nightingale* 65
Laser damage in germanium *L. J. Willis, D. C. Emmony* 222
Laser damage in optical materials at 1.06 μm *R. M. Wood, R. T. Taylor, R. L. Rouse* 105
Laser Doppler velocimeter with variable optical frequency shift *P. Buchhave* 11
Laser in dentistry: potential clinical applications The *R. H. Stern, H. Eastgate, W. J. Mautner, C. Morgan* 22
Laser medicine: some recent developments *L. Goldman* 87
Laser output losses with intra-cavity etalons *D. Fua, G. Magyar* 63
Loose contact detection using laser speckle *P. Waterworth, D. C. J. Reid* 135
Movement measurement by modulated lasers using frequency lock loops *G. M. S. Joynes, Q. V. Davis* 169
Near room temperature cw CO laser with a high-power single-frequency output *M. J. Colles, R. B. Dennis, J. S. Webb, J. W. Smith, R. L. Allwood* 73
Non-coherent optical processing *G. L. Rogers* 153
Optical alignment using Fourier imaging phenomenon and Moiré technique *K. Patorski, S. Yokozeki, T. Suzuki* 81
Optical digital computers *B. M. Watrasiewicz* 213
Optical pulse broadening in long fibre wavegudes *D. B. Keck, R. D. Maurer* 229

Optical technique for measuring angular vibrations in intermittent motion mechanisms, An *P. Barton, J. Rees Jones, M. J. Lalor* 181
Optical transmission of bulk plastic material and plastic light-guides at high optical powers *H. D. Reidenbach, F. Bodem* 131
Stable photo-sensitive polymer layers for holography *N. Sadlej, B. Smolinska* 175
Study of shockwave propagation in a metal bar by high-speed interferometry *M. P. Wright* 113
Thoughts on the future of holography in biology and medicine *P. Greguss* 253
Tunable far infra-red sources based on Landau-level transitions *E. Gornik* 121
Two-dimensional vibrations analysed by speckle photography *E. Archbold, A. E. Ennos* 17
Visual performance with biocular magnifiers *M. H. Freeman* 266
White-light speckle photography for measuring deformation, strain, and shape *C. Forno* 217
